

Proposal No. 05

(Proposal details for the R&D scheme of USOF)

Subject: IP Repository

Problem Statement / Challenge title	To create and manage the large Indian IP corpus for 5G Technology
Challenge brief / definition	Developing a Repository for Patents (filed by inventors from India) of 5G technology where both Licensees and licensors are brought on a single platform.
Future expectation	Good place for patent monetization. It will serve Application areas/market/segments in 5G/ startups/ cross-licensing/Mergers & acquisitions and other 5G players in India and abroad. Could be hosted on cloud and linked to our website or create one. The software could be extended to IP management for technologies beyond 5G or any other technologies.

Format of Response

Companies / organizations / institutions / individuals developing enabling technologies / modules / components / subsystems / products are required to respond in the format provided in Annexure-A, on the DOT website (link address provided- refer "format of response")
