Proposal No. 24
(Proposal details for the R&D scheme of USOF)

Subject: AI enabled use cases applications – H.323 and legacy VC solution

Problem Statement	Interworking with H.323 and legacy Video Conferencing Systems
Problem description	A client less video conferencing solution that uses WebRTC , has to interwork with legacy hardware-based VC solutions using H.323 protocol or some other mechanism so as to enable seamless Video Conferencing experience to the participants that connect through the legacy video conferencing solutions. These legacy solutions can be from any OEM.

Format of Response

Companies / organizations / institutions / individuals developing enabling technologies / modules / components / subsystems / products are required to respond in the format provided in Annexure-A, on the DOT website (link address provided- refer "format of response")
