Proposal No. 26
(Proposal details for the R&D scheme of USOF)

Subject: AI enabled use cases applications

Problem Statement	Federated architecture based Collaborative Working Platform
Problem Description	There is a requirement for setting up a scalable indigenous Collaborative Working Platform for the government officials and the citizens. There is a requirement for augmenting the existing C-DOT solutions and create a new collaborative ecosystem. In addition to being scalable and secure, the solution should also have additional capabilities like Remote Desktop Control and Project Tracking. The solution should support Android, iOS, Windows and Browser based clients.

Format of Response

Companies / organizations / institutions / individuals developing enabling technologies / modules / components / subsystems / products are required to respond in the format provided in Annexure-A, on the DOT website (link address provided- refer "format of response")
